

Level 1 Practice: Creating a SAS Table

Practice Quiz. • 20 min. • 1 total point available. 1 total point

1. The **pg1.eu_occ** SAS table contains monthly occupancy rates for European countries from January 2004 through September 2017. If necessary, [start SAS Studio](#) before you begin.

1 / 1 point

Reminder: If you restarted your SAS session, you must run the **libname.sas** program to access your course files.

1. Open the **pg1.eu_occ** table and examine the column names and values.
2. Open **p104p01.sas** from the **practices** folder.
3. Modify the code to create a temporary table named **eu_occ2016** and read **pg1.eu_occ**.
4. Complete the WHERE statement to select only the stays that were reported in 2016. Notice that **YearMon** is a character column and the first four positions represent the year.
5. Complete the FORMAT statement to apply the COMMA17. format to the **Hotel**, **ShortStay**, and **Camp** columns.
6. Complete the DROP statement to exclude **Geo** from the output table.
7. Submit the program and view the output data.

How many rows are in the **eu_occ2016** table?

348

✓ Correct

```
data eu_occ2016;  
  set pg1.eu_occ;  
  where YearMon like "2016%";  
  format Hotel ShortStay Camp comma17.;  
  drop geo;  
run;
```
