

Activity 3.06

Practice Quiz. • 10 min. • 1 total point available. 1 total point

1. If necessary, [start SAS Studio](#). Open **p103a06.sas** from the **activities** folder and perform the following tasks:

1 / 1 point

1. Modify the OUT= option in the PROC SORT statement to create a temporary table named **storm_sort**.
2. Complete the WHERE and BY statements to answer the following question: Which storm in the North Atlantic Basin (*NA* or *na*) had the highest **MaxWindMPH**?

Allen

✔ Correct

Allen had the highest MaxWindMPH.

```
proc sort data=pg1.storm_summary out=storm_sort;  
  where Basin in("NA" "na");  
  by descending MaxWindMPH;  
run;
```
