

## Activity 1.02

Practice Quiz • 10 min • 1 total point

1. If necessary, [start SAS Studio](#). Open **p101a04.sas** from the **activities** folder and perform the following tasks:

1 / 1 point

1. Format the program to improve the spacing. Notice that a syntax error is detected. Fix the error and run the program.
2. Read the log and identify any additional syntax errors. Correct the syntax errors and format the program again.
3. Add a comment to describe the changes that you made to the program.
4. Run the program and examine the log and results.

How many rows are in the **canadashoes** data?

- ☐ 395
- ☒ 37
- ☐ 0

✓ Correct

solution code

```
/*Missing semicolon, unbalanced quote,  
and misspelled PROC fixed.*/
```

```
data canadashoes;  
  set sashelp.shoes;  
  where region="Canada";  
  Profit=Sales>Returns;  
run;
```

```
proc print data=canadashoes;  
run;
```
