

Activity 3.04

Practice Quiz. • 10 min. • 1 total point available. 1 total point

1. 1. Go to support.sas.com/documentation .
2. Look up the **Zw.d** format.

1 / 1 point

What does the format do?

- ☒ Displays standard numeric data with leading zeroes.
- ☐ Displays standard numeric data without leading zeroes.

 **Correct**

Example: 1350 with the Z8. format applied would be displayed as 00001350

You can find this information by typing **Zw.d** in the search box and selecting the first link to **Zw.d Format**.

You can also find this information by following these steps:

1. Select **Programming: SAS 9.4 and Viya 3.5**.
2. In the **Quick Links** section and under **Syntax**, select **Actions, Procedures, and Language Elements**.
3. Under **Language Elements**, select **Formats**.
4. Select the link for **Zw.d**.
