Which DATA step creates a permanent output data set?

1 / 1 point

- ☒

```
data out.storm_new;  
    set pg1.storm_summary;  
run;
```
- ☐

```
data storm_new;  
    set pg1.storm_summary;  
run;
```
- ☐

```
data work.storm_new;  
    set pg1.storm_summary;  
run;
```

**Correct**

This DATA step creates the **storm\_new** table in the OUT library.
